

Liquidlocker™ Mini - Ø195mm

Anti-Surge Baffling Safety System

SKU: LLB195

An anti-surge baffling safety system that effectively reduces fluid movement. This is made of food-grade quality material perfect for use with all tanks.

- » Average ratio is 1 LiquidLocker™ ball per 5.8L (1:6)
- » Significantly reduces fluid movement for improved load stability during transit
- » Food grade quality material, suitable for diesel & other liquids
- » Complies with load restraint guide performance standards
- » Suitable for use with all tanks (poly, steel, fibreglass, aluminium etc.)
- » Simple to install! Supplied in two halves, requires only a quick click together and insert through the tank lid opening
- » No rust, lightweight and durable
- » Low Liquid Displacement
- » 200g weight per liquid locker
- » It takes up just 1.7% of your tanks total volume!
- » The irregular shape allows balls to interlock preventing any movement of the balls inside the tank

SPECIFICATIONS

Material	Polyethylene
Ball Diameter	195mm
Application Ratio	1 Ball per 5.80 Litres
Weight	200g
