## M-SERIES

### MECHANICAL-DRIVE SPRAY UNIT

You asked, we listened. After years of research and testing, TTI proudly presents the **SuperReel™ M-Series** – the **most powerful, easy-to-use, and easy-to-service** mechanical-driven twin reel sprayer on the market.

Engineered for durability and efficiency, this game-changing sprayer features a **Honda engine-powered reel retraction system**, delivering unmatched strength and reliability. Designed with spray contractors and councils in mind, the SuperReel M-Series makes maintenance a breeze, ensuring you spend less time servicing and more time getting the job done. Experience the next level of spraying performance with TTI's latest innovation!

### MECHANICAL-DRIVE SPRAY UNIT

# Specifications

**600 LITRES**

 **320kg (Dry Weight)**  **2000 x 1250 x 990mm (LWH)**

SKU: MUF0600L0540TQ1

HONDA ENGINE-POWERED REEL RETRACTION SYSTEM  
**POWERFUL, EASY-TO-USE, AND EASY-TO-SERVICE**

# Standard Features

## Ergonomic & Easy to Service

Designed for operator comfort, safety and easy maintenance. Everything right where you can access it.

## Honda Engine & Bertolini Pump

Honda GX270 engine coupled to a high-performance Bertolini 580psi pump for ultimate performance & reliability.

## Mechanical-Driven Twin Auto-Rewind Reels

Virtually unstoppable rewind power, with up to 250m of anti-kink nylon hose & Turbo400 adjustable spray guns.

## HawkLine™ Remote Control System

TTi's Next-Gen, long-range remote control for engine start/stop, reel rewind & valve activation.

## Integrated Flush System

Isolates the chemical in the tank & allows fresh water to be drawn & flushed through your pump and lines.

## Heavy-Duty Galvanized Steel Frame

Fabricated for long-term toughness, forkable from any side & includes pre-drilled bolt holes for mounting.

## Fully Drainable, Chemical Resistant Poly Tank

The fully drainable sump tank ensures it's easy to flush out and guarantees maximum use of the contents.

## Hydraulic-Crimped Plumbing

Heavy-duty hydraulic crimping eliminates the chances of leaks occurring in hoses & fittings.

# Upgrade Options

## PADDED DETACHABLE WAIST BELT

For Added Comfort and Support

## QUICK-FILL VENTURI SYSTEM

Rapid External Water Source Filling

## COMPACT DIGITAL TACHOMETER

Motor Hour Reader for Precise Hour Tracking

# HawkLine™

## Remote Control System

The HawkLine™ Remote is purpose-built to work seamlessly with the SuperReel™ M-Series, giving you reliable wireless control in the paddock, on the job, or wherever the hose leads you.

### 2km+ Wireless Range

Strong, reliable signal gives you freedom to move while staying in full control of your reel.

### Multi-Function Operation

Operate the valve, reel rewind, and start/stop the engine, all from a simple, compact remote.

### Tough, Weather-Resistant Build

Built to handle dust, spray, knocks, and everything else the Aussie climate throws at it.

### Glove-Friendly & Easy-to-Use

No fiddly buttons or screens - just straightforward control with a simple, intuitive layout.

# Mechanical-Drive

## Twin Reels

### Engine-Driven, Chain-Powered Muscle

Featuring a chain-driven mechanical rewind system, the twin reels deliver consistent, high-torque hose rewind, even in challenging terrain. Each reel is rated for up to 250m hose, optimising productivity and reducing manual strain on the operator.

# What's Sets the M-Series Apart?

## OTHERS

- ❌ Difficult to service and access pump and motor
- ❌ Limited to 200m of hose
- ❌ Unreliable remote and no engine control

## M-SERIES

- ✅ Operator first design with easy access pump, motor and controls
- ✅ Up to 250m of anti-kink nylon hose, for those remote, hard-to-reach areas
- ✅ Twin HawkLine™ remotes, tested up to 2KM w/ engine start/stop control built in

**Parts Backup and Support**

# Advantages of TTI Poly Tanks

## SAFE PLASTIC

*(Food Grade / Potable Water)*

Unlike many other plastics, polyethylene is considered a safe plastic as it does not contain any known harmful chemicals. The solvent resistant plastic can be considered food grade, and is safe for carting potable (drinking) water.

## SUPER STRONG

There are many variants of polyethylene, including LDPE, HDPE (high density polyethylene) and LLDPE (linear low density polyethylene). LLDPE is the preferred polyethylene used by TTI, as it offers high tensile strength, paired with impact and puncture resistance, and elongates under stress.

## LIGHTWEIGHT

Polyethylene manufacturing creates branching of carbon atoms which denote the density, and therefore molecular weight of the plastic. The more dense the branches, the heavier the polyethylene, and vice versa.

## FLEXIBLE

The lightweight properties mentioned above lend themselves to the flexibility of polyethylene. To put it simply, the lighter the unit, the less compact the intermolecular structures, creating space for movement.

## IMPERVIOUS TO MOST CHEMICALS

Most types of polyethylene have high chemical resistance, meaning they are not attacked by strong acids or strong bases. It also offers the advantage of moisture-vapour and electrical resistance.

## UV STABILISED

Slip, slop, slap and UV stabilise! UV stabilisers are often used in plastics to prevent long-term effects of ultraviolet exposure. All TTI tanks are fully UV Stabilised.

## NO RUST

Unlike some other types of tanks, polyethylene tanks are moisture-vapour resistant, and therefore rust and corrosion free. Even when exposed to weathering, salt water and harsh chemicals, poly is still strong!

## Dealer Locator Find Your Nearest TTI Dealer

Keen to get your hands on the SuperReel™ M-Series? With TTI dealers right across Australia, it's easy to track one down near you.

Scan the QR code to access our online dealer locator and find your local TTI partner in seconds. Need a hand choosing the right setup? We're here to help!
